PROFILE STATEMENT

Motivated and detail-oriented aspiring QA Engineer with a growing focus on software quality assurance. I have hands-on experience with API testing, SQL-based backend data validation, debugging, and frontend validation. I'm familiar with writing test cases, identifying and reporting defects, and performing functional and UI testing. I'm a proactive learner who is eager to improve QA skills through hands-on work and guidance from experienced team members.

RELEVANT EXPERIENCE:

Associate QA, *Ram Laxman Innovations* ⧉   Jan 2026 – Present
- Performed API testing using Postman, validating authentication flows, status codes, data accuracy, and edge cases in development environments.
- Conducted functional and exploratory testing on live user workflows, ensuring proper input validation and error handling across key features.
- Identified and reported a production-level OTP API defect allowing alphanumeric phone numbers, documenting clear reproduction steps and supporting resolution.
- Logged and tracked defects in Jira, and structured the board by organizing epics, user stories, and bug workflows to improve issue visibility and tracking.

Quality Assurance Intern, *Nuptse Technologies* ⧉   Sep 2024 – Mar 2025
- Validated REST APIs using Postman before frontend integration, checking response status, data accuracy, and edge cases to prevent UI-level defects.
- Performed functional and non-functional testing on insurance workflows, validating form inputs, and error handling across key user journeys.
- Documented and reported defects with clear reproduction steps and expected vs actual results, enabling faster debugging and fixes by backend developers.

Audio Transcriber, *TransPerfect* ⧉   Mar 2023 – Jan 2024
- Ensured high accuracy by reviewing, verifying, and correcting transcribed audio text.
- Applied strong attention to detail and quality checks.

EDUCATION

Bachelor in Computer Science and Information Technology (BSc. CSIT),   Oct 2019 – Nov 2024
Trinity International College, Tribhuwan University, Dillibazar, Kathmandu

TECHNICAL SKILLS

Testing Skills
Functional testing, UI testing, API testing (Postman, Newman), API response validation & Assertions, Database testing (MySQL), Load Testing (K6), Test Case Design & Documentation

Tools
Playwright, Postman, Jira, Git, Github, DevTools, Figma

Developer Skills
HTML, CSS, JavaScript

Concepts
SDLC, STLC, Agile, Scrum, Bug Reporting, REST API Concepts, API chaining, Responsive Design, Test Case Design Techniques

CERTIFICATION

SQL Certification (50 Practical Tasks Completed) at SQL Academy (Online) — Jan 2026

MERN stack training at Mindrisers Technologies — Dec 2023 - Apr 2024

30 days bootcamp on HTML, CSS and JavaScript at Code for Change — Nov 2022 - Dec 2022

SOFT SKILLS

- Problem-solving
- Attention to detail
- Communication
- Collaboration
- Critical Thinking
- Time management
